

LOW CODE

EXPERIMENT-2

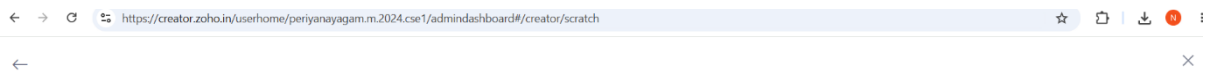

NAME: M.PERIYA NAYAGAM ROLL NO: 240701382

Aim: To build a simple application on the Zoho Creator platform by designing a form and a report, and to get familiar with the Develop, Deploy, and Manage sections offered by Zoho Creator.

Setting up Zoho Creator:

Creating the Sample Application – Steps Followed:

1. Signed in to the Zoho Creator platform.
2. Selected the option to create a new application.
3. Chose to build the application from scratch.
4. Entered the application name as "FORM_LOWCODE".
5. Clicked Create Application to generate it.

Creating the Form – Steps Followed:

6. Navigated to the Create menu and selected Form.
7. Entered the form name as "department".
8. Added the required fields, namely Department Name, Department Head, and Department Location, while Department ID was configured as an auto-generated number field.
9. Saved the completed form.

The screenshot shows the Zoho Creator form builder interface for a 'Department' form. The 'Basic Fields' panel on the left contains icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The main area displays the form fields: Department ID, Department Name, Department Head, and Department Location. A 'Field Properties' panel on the right shows settings for the selected 'Department ID' field, including Field name, Field link name, Validation, Initial value, Character maximum, and Data Privacy.

Explanation: A form is used to collect information entered by the user through a set of input fields. Once submitted, this data is stored within the application's database.

Viewing the Live Form – Steps Followed:

10. Opened the live "department" form to enter data.
11. Entered sample department details (e.g., CSE, Raj, Chennai).
12. Submitted the record successfully.

The screenshot shows the Zoho Creator live form view for the 'Department' form. The sidebar menu on the left contains options: Department, Department Report, Asset Details, Technicians, Maintenance Requests, Maintenance Approvals, and Repair Progress. The main area displays the form fields: Department ID, Department Name, Department Head, and Department Location, with a 'Submit' button at the bottom.

Creating the Report – Steps Followed:

13. Navigated to the Create menu and selected Report.
14. Selected the department form as the source to generate the "department Report".
15. Generated and saved the report.

The screenshot displays the Zoho Creator interface for an application named 'ABC Application'. The main view is a 'Department Report' table. The table contains three records with the following data:

Department ID	Department Name	Department Head	Department Location
3	it	az	chennai
2	ece	abc	chennai
1	cse	xyz	chennai

The interface includes a sidebar with navigation links: Department, Department Report (active), Asset Details, Technicians, Maintenance Requests, Maintenance Approvals, and Repair Progress. The top bar shows the application name, trial status (8 days), and options to upgrade, edit, or help.

Explanation: A report displays all the records submitted through the form. It enables users to search, sort, filter, and manage the stored records efficiently.

Exploring the Platform Architecture and Interface:

Develop:

The Develop section is used to build applications. It enables users to design forms, reports, pages, and workflows, and to further customize the application using Deluge scripting.

Deploy:

The Deploy section is used to publish the application, allowing it to be shared securely with other users. It is also where user roles and permissions are configured.

Manage:

The Manage section is used to administer the application. It handles users, backups, and integrations, while also monitoring the application's performance and security.

Result:

Thus, an account on Zoho Creator was successfully created, and a sample application comprising a department form and report was developed. The Develop, Deploy, and Manage sections of the Zoho Creator platform were also explored successfully.
